Bureau of Materials and Physical Research
CERTIFIED REINFORCING STEEL EPOXY COATING PLANTS
March 24, 2006

This list supersedes the March 14, 2003 list.

Effective with the April 25, 2003 letting, epoxy coated reinforcing steel and all dowel bars must be coated by a producer certified under the Concrete Reinforcing Steel Institute's (CRSI) Epoxy Coatings Plant Certification Program. This requirement is being implemented by a Special Provision that modifies Articles 1006.10(b)(2) and 1006.11(b) of the Standard Specifications.

Inspection of Epoxy-Coated Bars shall be in accordance to the Bureau of Materials and Physical Research Policy Memorandum 01-04, "Inspection of Epoxy-Coated Reinforcing Bars."

The official list of certified coating facilities is available on the CRSI Internet site. This link is provided for the convenience of IDOT and its Contractors. http://www.crsi.org/pdf/Certified_Plants_12_05.pdf
